

Hydraulic Post Hole Digger

Hydraulic Post Hole Digger is equipment, which can drill/dig holes of various size and depths in soil.

Post Hole Digger is used to make pits of plantation of mangos, coconut, tea, pomegranate, Lemon, Phyllanthus, embolic, sugarcane, solar plants, road light electric pole etc. Tractor PTO of 540 RPM mechanically drives Post Hole Digger.

Post Hole Digger consists of a stabilizer system. Which keeps the auger perpendiculars to the ground while in operation and controls swinging of auger while moving from one point to another point.

Post Hole Digger Auger end point and the bending blades are made replaceable Post Hole Digger Gearbox, Power Transmission, Shaft and spirals are most important.

Heavy duty Tubular Frame Specials steel grade cast cutting tip with semi double fighting. It has heavy duty gear box with output shaft with shear pin protection

Technical Specifications (Item Code:GK10)

Technical Specifications (Item Code:GK10)	
FRAME	Heavy Duty square pipe
HITCH	Category 1 & Category II
GEARBOX	Compatible with 75 HP maximum
OUTPUT SHAFT	55 mm
INPUTRPM	540
FASTENERS	High tensile
PROTECTION DEVICE	Shear-pin
AUGER LENGTH	2250 mm (as per order)
AUGER SIZES	12", 18", 24", 36"
AUGER BLADE	With carbide bits (replaceable)
AUGER POINT	Replaceable
ACCESSORIES	Storage Stand
APPROX. WEIGHT	370 kg. Hydraulic
